

**\* If you use Windows Vista, please follow these steps first**

In Vista you might receive an error message while you try to open the program you just installed. This is because of some security settings in Vista; don't worry about it, this can easily be resolved and here is how.

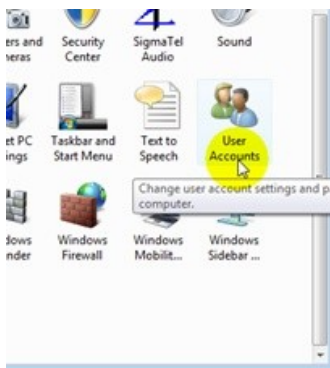

Please click the start icon

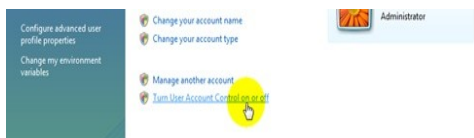

Click control panel

Select Classic View

Select User Accounts

Select Turn User Account Control on or of

Uncheck Use user Account Control .....

After you have Unchecked press OK

Restart Your Computer is asked and after Restart everything will work fine.
